🔗 [Gunjan Puri](#)

Summary:

Software Developer specializing in full-stack web development with experience in Node.js, Java, and MySQL. Built an AI-powered expense management system integrating LLM-based insights, real-time chat, and group expense tracking. Experienced in developing scalable backend APIs, authentication systems, and database-driven applications. Passionate about building intelligent and user-centric software solutions.

Education:

Bapurao Deshmukh College of Engineering, Sewagram
Bachelors of Technology in the branch of Computer Engineering (CE)

Graduation year: June 2026

Smt. Nusabai Chopane Mahavidyalaya, Wani
HSC [MSBSHSE]

May 2022
Percentage: 60%

Macaroon Students Academy, Wani
SSC [CBSE]

May 2020
Percentage: 68.6%

Technical Skills:

Programming Languages: Java, Python, C, C++.

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot (learning)

Software & Tools: Git, GitHub, VS Code, AWS, Jupyter Notebook

Databases: MySQL, MongoDB.

Related Skill sets: Operating Systems, Software Engineering.

Operating Systems: Windows, Ubuntu.

Currently Learning tools & technologies: Full stack web Development in java.

Experience:

Assistant to Software Engineer:

Aug 2024 – Jan 2025

Collaborated on developing a movie recommendation system using Python and MySQL, improving recommendation accuracy through data preprocessing and model optimization. Utilized AWS and Jupyter Notebook for data analysis and deployment.

Fullstack Intern:

Nov 2025 – Jan 2026

Developed a full-stack Library Management System using Java and MySQL, implementing modules for book tracking, user management, and issue/return workflows. Designed RESTful APIs, integrated authentication and role-based access control, and built responsive UI components. Improved system efficiency and ensured secure data handling.

Projects:

1. Blood Bank:

Developed a location-based blood donation platform enabling real-time connection between donors and recipients. Implemented secure authentication, optimized database queries, and designed a responsive UI for better accessibility. Integrated Indian hospital and city datasets for improved usability.

Project Link: <https://github.com/gunjan-puri-03/Blood-Bank>

2. AI-Powered Expense Management System (Splitwise):

Completed a full-stack expense management platform with group expense tracking, balance settlement, and real-time chat features using Next.js, Tailwind CSS, Node.js, and REST APIs. Implemented authentication, scalable backend architecture, responsive UI, and explored LLM-powered expense insight generation.
